

12w solar panel

Overview

What is a 12W solar panel?

A high-efficiency robust 12W solar panel to supply power to various application scenarios such as smart agriculture and smart city. Measuring weather and other data for outdoor application scenarios often requires sensors and data loggers in places far from any power grid.

How many watts can a solar panel charge?

Notably, our solar panel boasts an impressive onboard storage capacity of up to 37Wh, ensuring that your camera gets backup power it needs even when the sun takes a break. The solar panel can be connected to two battery-powered cameras and charge them simultaneously.

What are the benefits of using a solar panel?

Double Charging Ports: It powers two battery cameras at the same time to ensure all-around protection. Weatherproof Design: Featuring a durable frame and stainless steel screws, the solar panel easily withstands rain, dust, snow and sun.

Is fusion flex 12 a good solar panel?

The Fusion Flex 12 solar panel does not fear shocks, scratches, dust, sand water or being bent, so it can follow you on all your adventures! This portable solar panel was designed with experts and enthusiasts to provide the best functionalities without compromising on other important features.

Where can solar panels be used?

Solar panels can be used where there is no power grid and enough sunlight to generate the necessary power for the sensor infrastructure. Environmental monitoring in remote areas like monitoring weather conditions in national parks or monitoring soil conditions on farmland are just some possible applications. Only registered users can write reviews.

Why should you choose a solar panel?

The Solar panel is robust enough to withstand the harsh conditions required in agriculture and environmental monitoring. The 6-pin waterproof aviation connector can be directly connected to the Sensor Hub. It charges the integrated battery of the Sensor Hub to supply electricity when the solar panels do not supply enough power.
