

# 20KV grid-connected inverter

#### **Overview**

#### What is an on-grid inverter?

An on-grid inverter, also known as a grid-tie or grid-connected inverter, is a type of inverter used with on-grid solar systems. It works with the grid or government electricity. An on-grid solar inverter will continue to run your load and send power to the power grid when your solar system produces extra electricity. (read more.).

What is a 20kW grid tie solar inverter?

Pure sine wave 20kW rated power grid tie solar inverter with competitive price and excellent quality, 2 MPPT, maximum input voltage to 850V, three phase 240V/ 380V/ 460 AC rated output voltage. The protection degree of the 20kw grid tie inverter is IP65.

What is the protection degree of 20kW grid tie inverter?

The protection degree of the 20kw grid tie inverter is IP65. MPPT efficiency can reach 99.5% with perfect self-detection and self-protection function. 3 phase on grid solar inverter is a good choice for home or industrial use.
