

25kW three-phase photovoltaic inverter

Overview

What is a 3 phase PV inverter?

A PV inverter for large-scale installation usually comes in three-phase arrangements. The PV inverter combines the output of rows of PV strings in DC and converts them to AC. For example, an inverter can process the output of a PV array with 500 PV modules. Three-phase output rated at 208 V or 480 V is commonly found in commercial PV inverters.
