How to convert 220V to 330vdc?

For Which I Decided to Use a Rectifier to Every Source Converting 220V to 330VDC by Filtering it out using a Capacitor. As your sources are power limited, voltage /current will drop with load. If the initial voltages are same, they will share current fairly equally. But 220VAC will give only 310VDC; add 1-2 volts of diode drop.
