

340KW monocrystalline photovoltaic panel

Overview

The 96-cell HIT® N340 solar panel provides a powerful combination of increased module efficiency, energy savings and durable long-term performance. Featuring a 20.3 module efficiency and 340 watts per panel.

What is a 320W monocrystalline solar panel?

The 320W monocrystalline solar panel comes with PERC technology. Monocrystalline solar panels are a type of solar panels, and this specific one has a capacity of 320 watts. The main difference between monocrystalline solar cells and PERC solar cells is the passivation layer added on the backside of the solar cell.

What is a 300W monocrystalline solar panel?

A 300W monocrystalline solar panel is a lightweight solar panel that enhances module efficiency while minimizing its weight. It is the perfect option for any off-grid solar system, especially for transportation applications such as RVs and boats. This monocrystalline solar panel features a lightweight substrate and laminate, making it suitable for outdoor applications.

What is a N340 solar panel?

Featuring a 20.3 module efficiency and 340 watts per panel, N340 delivers an advanced renewable energy source with zero emissions for any home. A temperature coefficient rating of -0.258%/°C, one of the lowest in the world, helps generate greater electricity output on the hottest days. Higher power output and greater energy yields.

340KW monocrystalline photovoltaic panel

<u>340W Monocrystalline Solar Panel - Atwin</u> <u>Engineering</u>

This 340w solar panel battery charger has a corrosion-resistant aluminum frame for extended outdoor use, allowing the panels to last for decades as well as withstand high winds. Features ...
