

545 double-glass single-sided module

Overview

Why should you choose double glass backsheet modules?

The double glass construction offers superior durability and weatherproofing compared to traditional backsheet modules, with a robust 30-year output warranty and exceptionally low 0.45% annual degradation rate.

What is jam72d30-545/mb?

With 144 half-cut monocrystalline cells and a module efficiency of 21.1%, the JAM72D30-545/MB provides an optimal balance of power density, reliability, and long-term performance for commercial and utility-scale installations.

How does the silk® plus Duetto module work?

Thanks to its double-sided cells, the Silk® Plus Duetto module also converts reflected light from the rear surface into energy. Depending on the nature of the reflective surface and the installation conditions (for example the distance from the ground and use of trackers).

What makes a 144-cell module a good choice?

The 144-cell size is also offered with a second glass with white patterning to increase the albedo of both the front and back of the module for higher yields, particularly suitable for utility scale installations. Half-cut design in combination with multi-busbar reduce operating current and internal resistance

545 double-glass single-sided module

Two-sided 525w 530w 535w 540w 545w Customed Economic ...

The average power generation on the back can reach 5%-30% of that on the front in different installation environments. LOW-LIGHT PERFORMANCE Relative low temperature coefficient ...
