

# **After replacing the battery cells in the new energy battery cabinet**

## Overview

---

How are battery modules produced?

The modules produced are inserted into battery layers on the production line. These layers are stacked on top of each other, assembled into battery packs and then tested thoroughly. The construction of the first production facilities has already begun.

What is a battery energy storage system?

Battery energy storage systems (BESS) stabilize the electrical grid, ensuring a steady flow of power to homes and businesses regardless of fluctuations from varied energy sources or other disruptions. However, fires at some BESS installations have caused concern in communities considering BESS as a method to support their grids.

What happened at Gateway energy storage facility?

On May 15, 2024, Gateway Energy Storage Facility in San Diego, California, experienced a BESS fire with continued flare-ups for seven days following the fire. The facility held about 15,000 nickel manganese cobalt lithium-ion batteries.
