

Algerian small photovoltaic panel manufacturer

Overview

Where are solar panels made in Algeria?

Alongside Zergoun, the manufacturer Lagua Solaire has 200 MW of annual capacity for solar panel production in Algeria. The production plant of Algerian telecommunications and renewable energy company Milltech has a facility in Mila, in the east of the country, with a production capacity of 100 MW for M3-based modules. Manufacturing hub.

How much does solar power cost in Algeria?

Algeria's Hamdi Eurl won two 80 MW plants and domestic PV panel maker Zergoun, alongside Ozgun, secured 80 MW in Guerara. The 19 projects represent an investment of €1.8 billion (\$1.96 billion) and the solar power prices proposed by the bidders ranged from €0.54/W to €0.81/W, with an average price of €0.625/W.

Will Algeria become a hub for solar glass production?

Offering its companies a low electricity price of about DZD 4.68 (\$0.03)/kWh, Algeria envisions becoming a hub for solar glass production, both for its domestic market and for US manufacturers, to replace Asian markets affected by an import ban on their photovoltaic equipment.

What is zergoun green energy doing in Algeria?

In order to meet the growing needs of the Algerian and African solar sector, Zergoun Green Energy has also created a joint venture with Greek company Elvan to set up a production plant for metal mounting structures in Ouargla to supply the Algerian, Greek and African markets.

How much energy does Algeria produce a year?

The country has an average of 3,000 hours of sunshine per year and global horizontal irradiation of almost 1,700 kWh/m²/year in the north and 2,263 kWh/m²/year in the south. Nevertheless, nearly 100% electrified Algeria

generates 99% of its energy from domestic gas.

Can Algeria replace its gas and oil exports?

To gradually replace its gas and oil exports, Algeria aims to position itself on the international energy scene as a supplier of blue hydrogen (produced by steam reforming gas equipped with carbon capture technology) and green hydrogen (produced via electrolysis powered by renewables).
