

All new energy small container stations in ASEAN

Overview

How can the ASEAN Power Grid facilitate investments in renewables?

To facilitate investments in renewables in ASEAN, it is critical to overcoming the barriers in renewable energy legislation, energy governance, and business environment. 28 Cooperation through the ASEAN Power Grid brings economic benefits to the region as a whole, and thus improves the affordability for energy transition.

What is the ASEAN Centre for energy?

opment across ASEAN. To accommodate this, the ASEAN Centre for Energy, with support from IKI German and AFD, is developing an online platform designed to provide essential services such as third-party project valuation, performance insurance, project certification, and introductions to prequalified capital sources for ene.

What are the key developments in ASEAN?

Key developments include the introduction of hydrogen and sustainable aviation fuel (SAF) by 2023 and 2025, respectively. Public opinion in ASEAN strongly supports the transition to renewable energy, with a majority favouring the cessation of new coal plant construction and backing the phase-out of coal by 2030.

Will ASEAN develop a carbon transport hub?

If ASEAN successfully develops this carbon transport hub, the implications extend far beyond its borders. In January 2025, as the Northern Pathfinder—the world's first liquid CO₂ carriers for large-scale CCS—docked in Singapore's bustling port, it signalled more than just a refuelling stop.

How much investment does ASEAN need for generation infrastructure?

Across scenarios, generation infrastructure will require a cumulative investment equivalent to 29.6%-44.6% of ASEAN's 2018 GDP (Gross Domestic

Product). The investment requirements for the expansion plan, however, are unevenly distributed across countries, especially with the ambition to achieve a carbon-neutral power sector.

How will ASEAN fuel economy roadmap affect the transport sector?

ompared to the BAS.In the transport sector as one of the sectors that makes a large contribution to sectoral energy demand besides industry, under RAS, through the implementation of ASEAN's commitment to increase vehicle efficiency within the ASEAN Fuel Economy Roadmap, the overall consumption will be reduced by 3%
