

# Are there liquid-cooled energy storage battery cabinets in Greece

#### **Overview**

Should Greece invest in energy storage facilities?

Currently there is a growing interest for investments in storage facilities in Greece. Licensed projects mostly consist of Li-ion battery energy storage systems (BESS), either stand-alone or integrated in PVs, as well as PHS facilities.

Does Greece have a battery storage pipeline?

Greece has emerged as one of the countries with the largest pipeline of battery storage projects, but as yet there has been little activity on the ground. This is changing as the long-awaited storage subsidy auctions have started, with the first projects being awarded support for both investment and operating costs.

Why is Greece launching a battery storage auction?

Initially a response to the COVID 19 pandemic, the focus has pivoted to support Greece's green energy transition. The storage auctions themselves require further approval under EU State aid rules. The pipeline of prospective battery storage projects now approaches 27GW, with over 500 projects granted a storage license.

Which countries are getting a new battery energy storage system?

Greece is getting four new battery energy storage systems (BESS) amounting to 105 MWh, while Germany's Intilion will develop 65 MWh for Switzerland's Primeo Energie. The UK's first transmission-connected co-located solar and BESS facility has contracted a new asset manager.

Will large battery storage systems help stabilize the electricity grid?

For this reason, large battery storage systems will play an increasingly important role in stabilizing the electricity grid in the future", said Frederik Süllwald, Head of Global Sales & Key Account Management at Intilion.

Are battery storage plants getting a license?

In fact, the Regulatory Authority for Energy (RAE) has been receiving applications for permits concerning battery storage plants. In total, Balkan Green Energy News reported, applications to RAE reached 1.6 GW during October's licensing cycle. This is on top of projects with 23.5 GW in total that were already submitted by over 300 companies.

#### Are there liquid-cooled energy storage battery cabinets in Greece

## How Can Liquid Cooling Revolutionize Battery Energy Storage ...

Among these, Battery Energy Storage Systems (BESS) are particularly benefiting from this innovative approach to cooling. As the demand for more efficient cooling solutions continues to
