

Austria photovoltaic off-grid power generation system

Overview

Is Austria poised for a significant transformation in solar energy?

Austria's solar energy sector is poised for a significant transformation as the government updates its subsidy guidelines to incentivize more power purchase agreements (PPAs) for solar photovoltaic (PV) projects.

Who manufactures photovoltaic modules in Austria?

Currently 4 manufacturers of PV Modules are operational in Austria: Kioto Photovoltaics GmbH, Energetica-Photovoltaic industries, DAS Energy Ltd. as well as Ertex-Solartechnik GmbH; Sunplugged, as a start-up, develops flexible photovoltaic modules for integration into building envelopes, devices and vehicles.

What is Austria's 'integrated grid infrastructure plan'?

An Austrian national "integrated grid infrastructure plan" is currently (mid 2023) available for review and comments. In order to achieve this target, the value for 2030 was also raised and now stands at 21 TWh, means that an average annual installation rate of around 2 GW must be ensured until 2040.

What is the IEA photovoltaic power systems programme?

The IEA Photovoltaic Power Systems Programme (IEA PVPS) is one of the TCP's within the IEA and was established in 1993. The mission of the programme is to "enhance the international collaborative efforts which facilitate the role of photovoltaic solar energy as a cornerstone in the transition to sustainable energy systems."
