

BESS price for the Dutch energy storage building

Overview

What are the economic opportunities for Bess assets within a Dutch electricity market?

We highlight the economic opportunities for BESS assets within one of the Dutch electricity markets in this article. The Dutch electricity market is undergoing a significant shift towards renewable energy, primarily solar, wind, and other sustainable sources.

How much does a Bess battery cost?

Factoring in these costs from the beginning ensures there are no unexpected expenses when the battery reaches the end of its useful life. To better understand BESS costs, it's useful to look at the cost per kilowatt-hour (kWh) stored. As of recent data, the average cost of a BESS is approximately \$400-\$600 per kWh. Here's a simple breakdown:

How many MW of Bess are there in the Netherlands?

To date, around 250MW of BESS has been installed in the Netherlands, while 840MW is permitted or under construction and another 690MW has been announced. Meanwhile, the scale of announced projects is on the rise.

What is a battery energy storage system (BESS)?

BESS stands for Battery Energy Storage Systems, which store energy generated from renewable sources like solar or wind. The stored energy can then be used when demand is high, ensuring a stable and reliable energy supply.

What is Bess in the Netherlands?

BESS in the Netherlands is a new and small but increasingly necessary industry. A striking growth in battery capacity began in 2021 when the total installed capacity rose by 65% compared to the previous year. This number doubled in 2022 and then tripled in 2023, reaching 621 MWh.

How much does Bess cost in China?

It is nonetheless still eye-opening to note just how big those differences in cost are. The average for a turnkey system in China including 1-hour, 2-hour and 4-hour duration BESS was just US\$101/kWh. In the US, the average was US\$236/kWh and in Europe US\$275/kWh, more than double China's average cost.
