

Balcony wall-mounted solar panels

Overview

Are solar panels suitable for balconies?

There are two main types of solar panel systems suitable for balconies: Plug-in solar panel options are designed for easy setup and don't require professional installation. All that's required is that the panels are placed on the balcony in a spot that receives the most direct sunlight.

How much does balcony solar cost?

When it comes to installing balcony solar, it's likely that you won't be able to fit more than two standard sized (350-400W) panels that are mains-connected. Straight away this limits your cost. With each standard size panel costing between £450 and £650, you can expect to pay a maximum of £1,300 for two full size panels.

Can you put solar panels on a balcony?

All that's required is that the panels are placed on the balcony in a spot that receives the most direct sunlight. Most plug-in panels come with a stand or mount to prop them up, but these won't be permanently fixed in one place. If you live in a windy area, make sure your panels are safe.

What is balcony solar?

"Balcony Solar" or "Balkonkraftwerk" is fairly new in Europe, but is growing rapidly. In Germany, a monumental electrical code change now allows up to 800 watts of solar power to be easily grid-tied using a normal household outlet in combination with certain equipment, requiring a permit but no electrician.

Are balcony solar panels a good investment?

Balcony solar panels can be a good addition for those living in flats and apartments to join the renewable energy movement. It's clear that they won't replace your entire electricity supply, but they can contribute to reducing your bills and carbon footprint.

What are the different types of balcony solar panels?

There are 2 overall types of balcony solar panels: 1. Full-size panels. These are the same as any other solar panels, except they're fitted on a balcony rather than a rooftop. Normal solar panels are rated for up to 400W. 2. Mini solar panels.
