

Bangladesh Energy Storage Frequency Regulation Project

Overview

Is energy storage regulated in Bangladesh?

For example, the Bangladesh Energy Regulatory Commis-sion (BERC) Licensing Regu-lations 2006 do not include rules for licensing of energy storage technologies (except for pumped storage). The institutional framework for the procurement and deploy-ment of such projects is well established in the country.

How much energy storage does Bangla-Desh need?

120GW of RE generation. If a similar ra-tio were to be considered for Bangladesh's short-term RE aspirations (~1GW in the next three years), the resulting energy storage requirements would amount to 250MW/ 500MWh of energy storage.

Can distribution companies provide electricity solutions for displaced communities in Bangladesh?

There are no service obliga-tions for distribution compa-nies to provide electricity solu-tions for displaced communi-ties in Bangladesh. Distribution companies and non-governmental organisations (NGOs) (in the absence of service area obligations) would be key institutional stakeholders for the deployment of this applica-tion.

Does the EU support green energy transition in Bangladesh?

The EU engagement and financial commitment in support to the green transition in Bangladesh covers different aspects of the power sector. This year, the EU has designed a comprehensive financing package of EU grant support towards Bangladesh Green Energy Transition.

How does the power sector support transport in Bangla-Desh?

The power sector continues to support the ongoing electrifica-tion of transport in Bangla-desh, through various initia-tives undertaken by distribu-tion

companies and the roll-out of an EV charging tariff.

Who is deploying EV charging stations in Bangladesh?

Various power sector agencies including Bangladesh Rural Electrification Board (BREB) and West Zone Power Distribution Company Limited (WZPDCL) have already deployed EV charging stations, as have various private investors (including SolShare).

Bangladesh Energy Storage Frequency Regulation Project

Batteries deployed in 'world's largest' frequency regulation project ...

Kokam claims the 24MW battery is the largest lithium NMC battery in the world deployed for frequency regulation purposes. Together the three systems form part of a bigger ...
