

Battery Energy Storage Bonus

Overview

The Investment Tax Credit (ITC) allows you to deduct a percentage of the cost of installing a renewable energy system—including battery storage—from your federal taxes. How Much Is It?

As of 2025, the ITC allows you to deduct 30% of your system's total cost (including equipment and installation). What are battery storage system tax credits?

Among the many provisions of the IRA, the introduction of battery storage system tax credits stands out as a major incentive for individuals and businesses looking to invest in energy storage solutions. These battery storage system tax credits aim to accelerate the adoption of energy storage technologies.

How do I apply for the battery bonus program?

To apply for the Battery Bonus program, customers must first contact a solar contractor to add storage to an existing solar system or install a new solar-plus-storage system. Hawaiian Electric cannot recommend a contractor or equipment.

Do solar battery storage systems qualify for tax credits?

Historically, there were only federal tax credits for solar battery storage. This meant that battery storage systems installed independently or added to existing solar systems did not qualify for these incentives.

What is the battery bonus program?

The Battery Bonus program is closed to new participants as of July 1, 2024. The Battery Bonus program is a 10-year program and is designed to help move Hawaii toward its goal of 100% clean energy by 2045 and add more renewable resources to the grid as Hawaiian Electric retires generators fired by fossil fuels.

What incentives are available for energy storage systems?

The Self-Generation Incentive Program (SGIP) offers cash rebates for installing energy storage systems. Rebates can go as high as \$1,000 per kWh for low-income or high-fire-risk areas. New York (NY-Sun Program) New York offers storage incentives through the NY-Sun initiative, helping reduce battery system costs by thousands of dollars.

Do you have to pay for energy storage?

But here's the good news: you don't have to shoulder the full cost yourself. Across the U.S. (and in many other countries), governments and utilities offer tax credits, rebates, and incentives to encourage homeowners to go green with energy storage systems.
