

Belgian Huijue Solar Photovoltaic Panels

Overview

Can you install solar panels on a roof in Belgium?

Installing solar panels on your roof is a (very) cost-effective operation. In Belgium, there are a number of subsidies to help cover the cost of installing solar panels. You can also choose the model of the self-consumption of energy produced by panels, which is also very advantageous.

How do solar panels work in Belgium?

Energy transformation Photovoltaic panels convert solar energy into electricity. Self-consumption and resale: In Belgium, you can consume the electricity you produce and sell the surplus. Service life: Recent models of solar panels last between 25 and 30 years. Subsidies: These facilities benefit from substantial public funding.

Are solar panels self-consumption a good idea in Belgium?

In Belgium, many people are opting for self-consumption for their solar panels. Here's what it means and what the advantages are: You use the electricity generated by your panels directly. If you produce too much, you can sell the surplus to the electricity grid. The upside of self-consumption:

Does Belgium pay for solar panels?

Each Belgian region (Flanders, Wallonia and Brussels) offers money to help pay for the installation of solar panels. The amount varies depending on where you live. Go to an online simulation to find out more. In Wallonia, for example, this aid can cover a large part of the installation costs.
