

# Bms battery management system sales

#### **Overview**

What is the market size of battery management system (BMS)?

The battery management system (BMS) market is projected to rise from USD 10.2 billion in 2025 to USD 23.2 billion by 2035, growing at a CAGR of 8.6%. Lithium-ion BMS will capture 44% of market value in 2025 due to widespread use in EVs, storage systems, and electronics. The automotive sector alone will expand at 7.4% CAGR.

What are the application areas of battery management systems (BMS)?

Key application areas for BMS encompass electric vehicles, telecommunications, industrial machinery, renewable energy systems, among others. Asia Pacific is estimated to account for the largest share of the battery management systems market in 2024.

What is the global battery management system market size?

The global battery management system market size was estimated at USD 7,193.5 million in 2023 and is projected to reach USD 31,265.5 million by 2030, growing at a CAGR of 23.4% from 2024 to 2030. Battery management systems are widely used in rechargeable batteries mounted in electric vehicles.

What is battery management system market?

By applications, the battery management system market is classified on the basis of the battery management systems used in automotive, energy storage, consumer electronics, renewables, telecom, healthcare, military & defense, and other industries.

Who makes battery management systems?

Texas Instruments, Analog Devices, and Panasonic lead innovations in BMS design. Asia Pacific leads global demand, with strong momentum in North America and Europe. The global sales of battery management systems are

estimated to be worth USD 10.2 billion in 2025, and are anticipated to reach USD 23.2 billion by 2035.

What is a centralized battery management system (BMS)?

The centralized segment held the largest market share in 2024. The centralized BMS functions as a single pack controller that monitors, balances, and manages all cells in the battery pack. Designing and building a centralized BMS is simpler and more cost-effective compared to other topologies.
