

# Budget for photovoltaic power station construction in the capital

#### **Overview**

Can cost of capital be used to estimate power generation cost?

Results underline large country differences in cost of capital. The approach can complement but not replace other methods to estimate cost of capital. The cost of capital (CoC) is an important parameter for accurately calculating power generation cost, particularly for capital-intensive renewables such as solar PV.

Is a solar PV project a capital expense?

The final annual expense is the land lease. Solar PV projects typically rent, rather than purchase, the land for the project; therefore, it is an operating expense and not a capital cost.

How does Seto calculate PV system cost?

Unlike most PV cost studies that report values solely in dollars per watt, SETO's PV system cost benchmark reports values using intrinsic units for each component. For example, the cost of a mounting structure is given in dollars per square meter of modules supported by that structure.

How much do solar panels cost in 2022?

Solar Average U.S. solar construction costs across all solar panel types increased 1.7% to \$1,588 per kilowatt (kW) in 2022. The increase was primarily driven by a 13% increase in the construction cost for crystalline silicon tracking panels, which increased to \$1,605/kW, the highest price since 2018.

How do market analysts evaluate the cost of PV systems?

Market analysts routinely monitor and report the average cost of PV systems and components, but more detail is needed to understand the impact of recent and future technology developments on cost. Consequently, benchmark systems in the utility-scale, commercial, and residential PV market

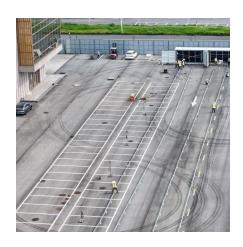

sectors are evaluated each year.

How efficient is a residential PV system in 2024?

The representative residential PV system (RPV) for 2024 has a rating of 8 kW dc (the sum of the system's module ratings). Each module has an area (with frame) of 1.9 m 2 and a rated power of 400 watts, corresponding to an efficiency of 21.1%.
