

Cambodia s new photovoltaic panel manufacturer

Overview

L-Q New Energy Co., Ltd, a unit of Chinese solar cell and module manufacturer Solarspace, has started manufacturing activities at its new factory in Cambodia. “We expect to reach full production capacity at the end of March,” a spokesperson from the company told pv magazine. Are solar panels imported or re-exported in Cambodia?

During the same period, the country’s solar panel imports rose rapidly and doubled to USD272 million but the volume was significantly lower than solar panel exports (Figure 1). This trade pattern suggests that a substantial portion of Cambodia’s solar panel exports may have been assembled domestically rather than imported and re-exported.

How can Cambodia benefit from the solar panel industry?

In recent years, Cambodia has been able to benefit from the emerging solar panel industry by establishing factories, training workers, and developing trade partners. By continuing to improve both hard and soft infrastructure and to strategically explore more trade opportunities, Cambodia’s solar panel exports have more room to grow.

Are Cambodia's solar panel exports facing a critical juncture in 2024?

After a short-lived boom in 2022-2023, Cambodia’s solar panel exports entered a critical juncture in 2024, facing significant challenges.
