

Can Prado be charged with an outdoor power source

Overview

How useful is the 220V AC socket in the Prado 150?

220V AC socket in the Prado 150 - how useful is it?

It's a 220V AC socket that is rated for 100W. and it seems like its not particularly useful. Supply obviously comes from the vehicles single battery, and it only gets power when the vehicle is running.

Is there a 12V DC socket in my Prado?

Most gear like tire air compressors or camping fridges run on 12V in any rate, yet there is no 12V DC socket in the back of this Prado that I can find. Also a 12V socket would have been better as I suppose their are less losses than converting the 12V to 220V.

Does a 2017 Prado have a 2 pin port?

My 2017 Prado has a 2 pin port in the cargo bay - I've purchased a SnoMaster 42 fridge which I've hooked up to a deep cycle car battery which is hooked up to a CTEK MXS 3.8 battery charger which, in turn, is plugged into the 2 pin plug point.

Can a nl90 run off a Prado's 100W socket?

I run a NL90 off the Prado's 100W socket when traveling. No problem. Low voltage reticulation we use (12V) is not always as good as its cut out to be. Low voltage means high current, high current means thicker wire for same losses or just higher losses with heat generation. Also hotter joints if it not a good one.

What's a key learning for a Prado trip?

The key learning (thanks @ gmmcdonald) for the end Nov Liuwa Plains, Zambia trip is to run the fridge (-16degC) off the Prado's rear passenger 12v cigi plug and keep the deep cycle battery topping up in the 2-pin plug while

driving long distances.

How do you keep a Prado from getting Dusty?

Mostly the Prado was parked in the shade so never draped over the vehicle. Mostly 1 end high up in a tree that I could rotate the panel around and the other end to a full jerry. This helped keep the solar out the dust.

Can Prado be charged with an outdoor power source

"Perfect Prado" 150 Build Update #5 // Off-grid Electrical System

In episode 5 of the Perfect Prado update video series, the 2021 Landcruiser Prado gets a full 12v system complete with a solar panel and a Redarc charger.
