

Can container-type lithium batteries be used directly

Overview

What are the lithium-ion batteries in containers guidelines?

The Lithium-ion Batteries in Containers Guidelines that have just been published seek to prevent the increasing risks that the transport of lithium-ion batteries by sea creates, providing suggestions for identifying such risks and thereby helping to ensure a safer supply chain in the future.

Can You ship lithium batteries in an ocean container?

If the vehicle can be handled in a non-upright position, it must be secured in strong, rigid outer packaging. For many carriers, certain lithium batteries are totally off limits. Container shipping giant MSC recently reminded its customers that it won't ship lithium batteries in an ocean container if they've been used or damaged.

How to secure a lithium battery container?

Segregation: It is recommended to segregate lithium battery containers from those containing other dangerous goods, particularly flammables, by at least one container bay (6 meters). Securing: All cargo must be secured within its container and on the vessel in accordance with the CTU Code and the vessel's Cargo Securing Manual.

How should a lithium battery container be segregated?

This allows for crew access for boundary cooling with fire hoses and permits flammable gases to vent to the atmosphere. Segregation: It is recommended to segregate lithium battery containers from those containing other dangerous goods, particularly flammables, by at least one container bay (6 meters).

Are lithium ion batteries safe to ship?

They're commonly used in hearing aids, wristwatches, smoke detectors and key fobs. Both lithium-ion and lithium metal cells and batteries are hazardous to ship, and they're subjected to roughly the same regulatory requirements

depending on mode of transport (i.e., ocean vs. air).

What are the classification and shipping requirements for lithium-ion batteries?

The classification and shipping requirements for lithium-ion batteries depend on their size and energy capacity (Watt-hours). For standalone batteries. Strict UN-certified packaging. IUMI strongly supports the SoC limit of 30% for air freight and advocates similar principles for maritime transport.
