

Cape Verde 5kw wind power generation system

Overview

Does Cape Verde have a wind farm?

The Cape Verde government has signed a contract with the domestic partly state-owned wind power operator, Cabeolica, to support its wind farm expansion and battery installation projects in the archipelago nation off the West African coast. Image credits: Alamy Stock Photo.

When will Cape Verde's wind farm expansion start?

Works on the wind farm expansion are due to commence in July 2024. Cape Verde's renewables account for 20% of the total installed capacity in the country, according to ALER, the renewables association of Portuguese-speaking African countries.

Will Cabo Verde produce 50% of its electricity by 2030?

The project supports Cabo Verde's objective of producing 50% of its electricity from renewable sources by 2030, in line with its commitments under the terms of its Paris Agreement's nationally determined contribution. Sign up for our daily news round-up!.

How can Cape Verde save money on fuel imports?

The company will also add a battery energy storage system (BESS) with a capacity of 9 MW/5 MWh in Santiago and another unit of 6 MW/6MWh on the island of Sal. The new facilities will contribute to annual cost savings of around CVE 1 billion in fuel imports, according to Cape Verde's minister of industry, trade and energy Alexandre Monteiro.

What is cabeolica wind power?

The project company, Cabeolica S.A., was established by the founding partners in 2009 and began generating power from September 2011. Lying across the trade winds belt, the archipelago has consistent wind speeds of up to 10m/s creating one of the best locations in the world for wind power

How does Cabo Verde's energy system work?

Cabo Verde's electricity system largely depends on imported fossil fuels, and these enhancements are anticipated to lower system costs and improve energy security.
