

# Chad photovoltaic power generation and energy storage quotation

#### **Overview**

Why is Chad a good place to invest in solar power?

Chad's location in the Sahel, which features brilliant sunshine especially during the dry season, and lack of alternate fuel sources such as coal make solar power an attractive export and investment sector. Chad currently generates electricity by consuming oil.

How much power will Chad generate?

The new project in Chad is expected to have a capacity of up to 200MW, which will increase Chad's existing installed generation capacity supplied to the city by 63% and boost Chad's total power generation capacity. The project is planned to be approved next year or in 2024, with the first power generation expected by 2026.

Why is electrification important in Chad?

The Government of Chad and development partners like the World Bank are prioritizing electrification to promote economic growth and inclusion. Per capita electricity consumption is one of lowest in the world and tariffs are among the highest.

What will OPIC's loan do for Chad?

OPIC's loan will help FinLux Ellen Sarl distribute solar kits and appliances to individuals, schools, health clinics and small businesses in Chad, providing them with an affordable source of reliable electricity. In 2020, the World Bank announced an electricity interconnection between hydropower produced in Cameroon and N'Djamena's electric grid.

## Chad photovoltaic power generation and energy storage quotation

## World Bank Approves \$311 Million to Increase Grid-Connected ...

Existing and prospective electricity customers in Chad, Liberia, Sierra Leone, and Togo will benefit from the new Regional Emergency Solar Power Intervention Project ...
