

China-Europe power energy storage installed capacity

Overview

Which country has the most energy storage capacity in Europe?

Europe added 19.1 GWh of energy storage capacity last year, up 12.4% from 2023. Italy has become Europe's largest energy storage market thanks to utility-side, front-of-the-meter (FTM) systems, and leads Germany and the United Kingdom.

Which country has the most energy storage capacity in 2024?

The global energy storage market had installed 175.4 GWh of capacity by 2024, with Tesla leading shipments. Europe accounted for 19.1 GWh of installed capacity last year, with Italy leading, ahead of the United Kingdom and Germany.

Is energy storage a global consensus?

The consultancy noted "the development of energy storage has become a global consensus," and pointed to the prediction, made at the COP29 climate change summit held in Azerbaijan in late 2024, that global energy storage project capacity will increase to 1.5 TW by 2030.

Will China's energy storage rivalry continue in 2025?

That rivalry could continue into 2025. Chinese giants CATL and BYD dominated direct-current-coupled energy storage systems in 2024, ahead of PotisEdge, Hithium and RelyEZ. CATL, BYD and newcomer Hithium are leading manufacturers of energy storage cells which are increasingly expanding into system integration.

How has cost decline impacted energy storage?

This trend may highlight that the cost decline over the past few years has driven energy storage into an era of accelerated diversification in the global market. The European energy storage market added 19.1 GWh of installed capacity in 2024, up 12.4% YoY, with drastic changes in the ESS landscape

throughout the year.

Should energy storage be developed?

Developing energy storage has become a global consensus. It was announced at COP29 in late 2024 that global storage capacity will increase to 1,500 GW by 2030, more than six times the 2022 level. As a result, InfoLink maintains a cautiously optimistic outlook for the medium- to long-term development of energy storage systems.
