

# Colombia exports to large-scale energy storage

#### **Overview**

How much electricity does Colombia produce?

Colombia's installed electric power generation capacity currently stands at 17,771 MW, with hydro accounting for 68 percent, gas and coal-fired power plants accounting for 31 percent, and the remaining one percent from wind and solar units. The country's energy matrix is clean but highly dependent on climatic conditions to generate hydro power.

How many wind and solar projects are in Colombia?

Colombia's 2019 renewable energy auction awarded contracts for nine wind and five solar projects. These projects are worth approximately \$8 billion and will add 1,365 MW of wind and solar capacity, due to be commissioned by 2022.

Is Colombia a leader in sustainable mobility?

Colombia is positioning itself to be a leader in sustainable mobility for the next decade. The country approved the first program for 20 percent biodiesel blends, and Law 1715 in 2014 further promoted private ventures in large-scale, renewable energy projects.

How much hydrogen will Colombia produce in 2021?

In 2021, Colombia's Ministry of Mines and Energy presented its Hydrogen Roadmap. Its stated goals were to reach between 1 and 3GW of electrolysis capacity in 2030 and produce 50 kilotonnes of blue hydrogen from new methane steam reforming plants and the capture and storage of carbon in existing facilities.

What is Colombia's energy transition process?

Colombia's energy transition process is underway. Former President Ivan Duque set a goal to increase non-conventional renewable energy installed capacity from one percent to more than 12 percent of the energy matrix by

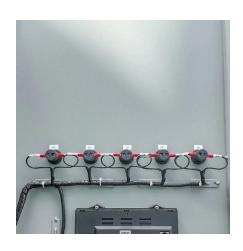

#### Will Colombia build a hydrogen value chain?

With abundant natural gas reserves and the largest coal producer in Latin America, Colombia is focusing on blue hydrogen production as a base from which to start building the hydrogen value chain. In 2022, Colombia published its roadmap for offshore wind development, part of a broader plan to wean the country off hydropower and fossil fuels.

#### **Colombia exports to large-scale energy storage**

# Canadian Solar Wins Energy Storage Project in Colombia of 45MWh

Located in the city of Barranquilla in northern Colombia, this project will consist of a 45 MWh lithium-ion battery energy storage system and is expected to reach commercial ...
