

Construction of Vanuatu Wind Solar and Energy Storage Project

Overview

Why is Vanuatu launching a solar farm?

The project underscores the Vanuatu government's commitment to decarbonising the electricity supply and aligning with international climate change goals. Notably, this solar farm represents the final direct-to-grid PV installation that can operate without an accompanying battery. Future projects will necessitate energy storage solutions.

Will solar power boost Vanuatu's energy independence and climate resilience?

The project aims to support the use of solar power and battery storage on the islands of Efate and Tanna, boosting Vanuatu's energy independence and climate resilience. New Zealand's Deputy Prime Minister and Minister for Foreign Affairs, Winston Peters, confirmed the country's commitment during a press conference held in Port Vila on Wednesday.

Does Vanuatu have horizontal solar insolation?

The International Renewable Energy Agency (IRENA) is publishing a Global Atlas for Renewable Energy which includes broad, indicative data for horizontal solar insolation for Vanuatu based largely on the US National Aeronautics and Space Administration (NASA) satellite data that has been gathered over the past thirty years.

Is solar PV a viable option for other islands of Vanuatu?

Options for other islands of Vanuatu. At this time, solar PV is recommended as the only practical and cost effective option for these particular islands as it is the only significant resource available that is known from experience elsewhere to be sustainable for energy production in remote rural villages.

Does Vanuatu have solar power?

Between 1992 and 2002 Vanuatu had a very active small scale rural solar PV program (SPREP, 2005; BizClim/EU, 2012) with support from various donor

agencies and the government's Sarakata Fund (using savings from a Japanese-funded hydro project in Santo).

How much does solar PV cost in Vanuatu?

The NAMA cost estimates are based on Scaling Up Renewable Energy in Low Income Countries – Investment Plan for Vanuatu (CIF, 2014) which estimated an average capital cost of US\$10,500 per installed kW of solar PV for remote sites in Vanuatu.
