

Costa Rica s integrated 5G base station

Overview

Does Costa Rica have a 5G network?

Liberty and Ericsson launch 5G SA network in Costa Rica, supporting digital growth across healthcare, tourism, and more. Costa Rica has launched its first 5G Standalone (SA) network, marking a significant milestone in the country's digital transformation. The deployment is part of a six-year agreement between Ericsson and Liberty Latin America.

Is 5G coming to Central America?

Secure your free spot! Standalone 5G is coming to Central America with the help of rival Nordic cellular vendors. Ericsson just signed a deal with operator Liberty to deploy a pure 5G standalone core in Costa Rica, which the Swedish vendor claims as a first for Central America — although that's debatable.

What is a 5G base station?

A 5G network base-station connects other wireless devices to a central hub. A look at 5G base-station architecture includes various equipment, such as a 5G base station power amplifier, which converts signals from RF antennas to BUU cabinets (baseband unit in wireless stations).

Does Ericsson have a 5G network?

The deployment is part of a six-year agreement between Ericsson and Liberty Latin America. The network features fully native 5G infrastructure using Ericsson's dual-mode 5G Core and advanced Radio Access Network technology.

Is Ericsson the New Liberty 5G supplier?

Although this deal is new, Ericsson has been Liberty's core supplier for a while. "Ericsson has been the sole supplier of their core network," noted Bolan. Ericsson announces a Liberty 5G SA deal in Costa Rica, where Nokia previously announced a similar deal with rival RACSA.
