

Cuba Energy Storage System Grid Management

Overview

ATESS is playing a key role in Cuba's renewable energy transformation by offering advanced energy storage solutions that address grid instability, enhance energy independence, and maximise the use of solar resources. Should Cuba update its energy grid?

While small-scale, such renewable energy initiatives can reduce pressure on the energy grid and provide relief in especially vulnerable places. Due to rising temperatures and increasingly unreliable energy infrastructure, action to update Cuba's energy grid is urgently necessary.

How can Cuba build a more resilient energy system?

Building a Cleaner, More Resilient Energy System in Cuba recommends numerous ways by which domestic policy in Cuba can prioritize working towards a more sustainable, resilient grid — especially by investing in the energy transition — and ways in which international cooperation can support these goals.

What does the EDF report tell us about Cuba's electric grid?

The report builds on a previous report published by EDF in 2017. That report, similar to this one, provided information on Cuba's electric grid and recommended paths forward.

What happens if the power grid fails in Cuba?

As the primary power grid fails, Cubans with resources are taking matters into their own hands, often in desperate ways. Businesses, hospitals, and wealthy families are installing gasoline and solar generators; the incessant noise from which has become part of the city's soundscape.

Why has Cuba's energy grid collapsed four times in the last 6 months?

On top of that, Cuba's entire grid has collapsed four times in the last six months. The problem stems from years of neglect of Cuba's energy

infrastructure, exacerbated by constrained access to foreign capital and a failure to adapt to new energy options.

How has Cuba regained electricity?

In the last 24 hours, Cuba has made significant strides in restoring electricity: 7:54 a.m.: Felton 1, part of the Lidio Ramón Pérez thermal power plant in Holguín province, was synchronized with the national grid, marking an important step toward stabilizing power after the total system disconnection on October 18.
