

Côte d Ivoire 5G Base Station Energy Management System Project

Overview

What is Côte d'Ivoire energy?

Côte d'Ivoire Energies (CI-ENERGIES): the state-owned entity responsible for monitoring and managing the electricity system. It also manage projects for which the state acts as the conceding authority.

Can decentralized solar mini grids support energy access in Côte d'Ivoire?

The study is determining the viability of building and operating decentralized solar mini grids to support energy access for up to 100 unelectrified communities comprising 190,000 persons in Côte d'Ivoire. The MMPE is implementing the project through its Direction Générale de l'Énergie.

How many MW does the Ivoirian power sector produce?

Electricity capacity stood at 2,548 Megawatts (MW) with 879 MW for hydroelectric plants and 1,669 MW for thermal power stations. The Ivoirian power sector recorded two new production units of 279 MW. The Ivoirian power sector relies on thermal power plants using natural gas as its main fuel source.

How much electricity is produced in Ivoirian compared to 2021?

National gross generation was estimated at 12,147.9 GWh, up 6.3 percent compared to 2021. Electricity capacity stood at 2,548 Megawatts (MW) with 879 MW for hydroelectric plants and 1,669 MW for thermal power stations. The Ivoirian power sector recorded two new production units of 279 MW.

Will Côte d'Ivoire become a West African electricity hub?

With the third largest electricity system in West Africa, the Ivoirian government is working toward making the country a West African electricity hub. Côte d'Ivoire's existing electricity system is the third largest in West Africa.

How many households in Côte d'Ivoire have electricity?

Côte d'Ivoire recorded 375,533 new households with electricity, including 251,133 connections funded by PEPT, a 2014 program which allows households with low incomes to pay for electricity over a 10- year period after an advance payment of 1,000 CFA (about \$2).
