

# Danish energy storage battery supply point

#### **Overview**

What is Danish Center for energy storage?

Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion. The ambition of DaCES is to strengthen cooperation, sharing of knowledge and establishment of new partnerships between companies and universities.

Will Eurowind energy develop a battery energy storage system?

Together with BOS Power Eurowind Energy will develop and install one of Denmark's largest battery energy storage systems (BESS) as part of an advanced hybrid power plant.

Are lithium ion batteries a viable energy storage solution?

Batteries, in particular lithium ion batteries, are among the most well-known and economically feasible technologies for energy storage. As of today it is the only realistic solution for batteries in electric cars, mobile phones and similar mobile devices. But there is a downside.
