

Distributed energy storage in Sweden

Overview

How many energy storage facilities are there in Sweden?

The opening ceremony for one of the 14 facilities was held in Eskilstuna. The Role of Energy Storage in the Energy Transition Since 2023, Ingrid Capacity and BW ESS have been working together on 14 large-scale energy storage projects strategically located within Sweden's electricity grid in price zones SE3 and SE4.

How many energy storage facilities will Ingrid capacity build in Sweden?

Ingrid Capacity plans to build an additional 13 energy storage facilities in Sweden by the end of 2024, with a total capacity of 196 MW/196 MWh. By the second half of 2025, the company aims to have over 400 MW/400 MWh of flexible resources in the Swedish electricity grid.

Why should Sweden invest in energy storage?

"Sweden faces increasing electricity demand, which must be addressed by expanding carbon-free energy production, strengthening energy grids, and improving energy storage capabilities. It is an honor to inaugurate the largest energy storage investment in the Nordic region.

What is the largest energy storage park in the Nordic region?

Romina Pourmokhtari, Sweden's Minister for Climate and Environment, officially inaugurated the largest energy storage park in the Nordic region. The initiative, led by Ingrid Capacity in collaboration with BW ESS, consists of 14 large-scale energy storage systems with a total capacity of 211 MW/211 MWh.

Can energy storage Ders reduce the need for Grid investments?

For example, the deployment and management of energy storage DERs, like distributed grid-connected batteries, is a technological complementarity to solar PV that could reduce the need for traditional grid investments in areas

with strained grid capacity (Eid et al., 2016).

Is solar PV a viable energy source in Sweden?

The Swedish Energy Agency has declared that it considers acquiring 5%–10% of this electricity generation mix (corresponding to 7–14 TWh) from solar PV an attainable goal (The Swedish Energy Agency, 2016).

Distributed energy storage in Sweden

Integrating distributed energy resources in electricity distribution

In this article, we present an exploratory study of Swedish DSOs and their challenges, activities and capabilities to manage DER integration. The study is based on a ...
