

East Africa pack lithium battery production equipment

Overview

What is a lithium battery pack?

The Lithium Battery PACK line is a crucial part of the lithium battery production process, encompassing cell assembly, battery pack structure design, production processes, and testing and quality control. Here is an overview of the Lithium Battery PACK line: Cell Types Cells are the basic units that make up the battery pack, mainly divided into:.

How to contact lithium battery pack engineering team?

Tel & Wechat: (0086) 158 6765 3608 Mr.Pan Our engineering team offers design solutions. The Lithium Battery PACK production line encompasses processes like cell selection, module assembly, integration, aging tests, and quality checks, utilizing equipment such as laser welders, testers, and automated handling systems for efficiency and precision.

What are the production processes of a battery pack?

Outer Packaging: Provides physical protection. Output Interfaces: For connecting the battery pack with external devices. Production processes cover cell selection and grouping, welding, assembly, aging testing, inspection, and packaging. Assembly Production Line The process flow of the PACK production line includes:
