

# **Eastern European backup power storage investment**

## Overview

---

Is energy storage a good investment in Europe?

Compared to classic renewables, energy storage has really only become an investable asset in Europe over the last few years on the back of technology advances, market price signals, and government support mechanisms.

Why should you invest in battery storage in Europe?

In Europe, the capacity of renewable energy sources is growing very rapidly, while traditional power plants are slowly being decommissioned. That's creating a unique new opportunity for investors amid the emerging demand for battery storage, which provides balance to electricity markets.

How do energy storage assets make money in Europe?

For short-duration energy storage assets, there are really three key revenue streams for energy storage assets in Europe. The first one is capacity payments, which have become a broadly implemented policy measure by governments to support system reliability and incentivize the installation of certain new power asset types.

Are energy storage assets a good investment?

Storage assets therefore depend on price spreads, which tend to be higher with more imbalances. Imbalances, in return, are driven by more renewables. Energy storage is therefore well-positioned for an electricity market dominated by renewables and represents an interesting new asset class.

Are energy storage assets a power trading asset?

In contrast to wind and solar, where the asset owner simply sells power into the grid when produced, energy storage assets are power trading assets. Different revenue streams can be stacked, and continuous trading decisions have to be made on whether to buy power, sell power, or participate in ancillary services.

## Eastern European backup power storage investment

---

### Eastern european energy storage battery project investment ...

The event focuses on Eastern Europe with a packed programme of panels from industry leaders responsible for the build out of solar and storage projects in Poland, Bulgaria, Romania, ...
