

Energy Storage Battery Retail

Overview

Are battery storage projects eligible for energy storage incentives?

The Program Manual [PDF] provides a full list of project eligibility and requirements. For battery storage systems above five MW of AC power, projects could be eligible for incentives through the Bulk Energy Storage Program. Additional details on both the Residential and Retail Energy Storage Incentive are available in the program manual [PDF].

What is battery energy storage?

Battery energy storage or BESS is a modern energy storage solution that stores energy using multiple battery technologies including li-ion for later use. Batteries receive energy from solar/wind or other energy sources and consequently stores the same in the form of current to later discharge it when needed.

What is the future of battery energy storage systems?

The battery energy storage systems industry has witnessed a higher inflow of investments in the last few years and is expected to continue the same trend in the coming future. According to the International Energy Agency (IEA), investments in battery energy storage exceeded USD 20 billion in 2022.

Where can I find information about energy storage incentives?

Incentive details will be available on the Residential Energy Storage Incentive Dashboard and Retail Energy Storage Incentive Dashboard. The Residential Energy Storage Incentives are available for contractors' installing storage on a new or existing home in New York State. Incentives are available for up to 25 kWh of storage capacity.

What are residential energy storage incentives?

The Residential Energy Storage Incentives are available for contractors' installing storage on a new or existing home in New York State. Incentives are

available for up to 25 kWh of storage capacity. The Program Manual [PDF] provides a full list of project eligibility and requirements.

How do I apply for a retail energy storage incentive?

Contractors and Builders can apply for this program separately through the NYSERDA Portal . The Retail Energy Storage Incentives are available for new commercial scale distributed (retail) energy storage projects up to 5 megawatts (MW) that are either located behind a customer's electric meter or interconnected directly to the distribution network.
