

Energy Storage Project Follow-up

Overview

Should energy storage projects be developed?

However, energy storage project development does bring with it a greater number of moving parts to the projects, so developers must consider storage's unique technology, policy and regulatory mandates, and market issues—as they exist now, and as the market continues to evolve.

Where can I find information about energy storage projects & policies?

The database-driven website is maintained by the DOE Office of Electricity Delivery & Energy Reliability at the Sandia National Laboratory website. All data can be exported to Excel or PDF. Energy storage projects and policies can be searched in through basic and advanced selection criteria, including via interactive data visualizations.

How can the Department of energy improve the understanding of energy storage?

Valuation Models A critical role for the U.S. Department of Energy to improve the understanding of energy storage project and portfolio valuation is to continue to develop and make publicly available valuation models that serve the upcoming need of new and innovative roles in the energy storage market.

What is a Recommended Practice for installing energy storage systems?

The National Electrical Contractors Association (NECA) published an ANSIapproved standard NECA 416-2016 titles, "Recommended Practice for Installing Energy Storage Systems (ESS)". It describes the methods, procedures and best practices that should be used for installing multiple types of energy storage systems.

Should energy storage projects have a scalable end of life process?

As the number of energy storage projects grow in scale and age, developing a responsible and scalable end of life process will rise in importance: for

government regulators (reduce landfill totals), project developers, lenders, and insurance providers (reduce cost and liability exposure), and OEMs (increase possible raw material source). 7.

Are energy storage projects different than power industry project finance?

Most groups involved with project development usually agree that energy storage projects are not necessarily different than a typical power industry project finance transaction, especially with regards to risk allocation.

Energy Storage Project Follow-up

PG& E's 182.5MW/730MWh battery complex secures

One of four major battery systems proposed by Pacific Gas & Electric (PG& E) in California's South Bay area lies now one step closer to construction, after being approved by ...
