

Energy storage battery degree

Overview

What can I do with a Master's in battery technology & energy storage?

The Master's Programme in Battery Technology and Energy Storage prepares you for a career in both world-class academic research and the Swedish battery/electromobility industry, where qualified professionals are in high demand.

What can I do with a degree in energy storage & vehicle science?

Topics students can explore include dynamic systems modeling, predictive control, hybrid powertrain systems, fluid dynamics, data fusion and fuel cell system design. You'll have opportunities to advance your studies and become a leader in energy storage and vehicle science through multidisciplinary and translational research.

What is a Master's in energy storage?

Master's Programme in Energy Storage is jointly organized by the School of Engineering and the School of Chemical Engineering. The programme is coordinated by the School of Engineering. Energy storage touches every discipline present at every step of the renewable energy value chain; it is the key to energy sustainability worldwide.

What will you learn in a battery integration course?

In addition to topics related to batteries, there will be an outlook on other energy storage systems, and the advantages of different technical solutions will be explained. Your knowledge will also be put into the context of battery integration, with a special emphasis on electric vehicles.

Is energy storage part of EIT InnoEnergy Master School?

Energy Storage is part of EIT InnoEnergy Master school. It is a two-year Master's programme including compulsory mobility for the students. More information can be found on the program's website Read about the

experience of our student Albert Rehnberg and follow his path!.

How can a student become a battery engineer?

With several institutes from faculties of mechanical engineering, electrical engineering, physics, or mathematics involved in the curriculum, students acquire the necessary technical know-how and competencies in the field of battery technology.
