

Eritrea s PV and energy storage subsidies

Overview

Why should Eritrea invest in solar power?

By establishing these solar plants, Eritrea will significantly reduce its reliance on fossil fuels, which currently supply over 90% of the nation's electricity. This endeavor is a crucial component of the Eritrean government's National Electrification Program (NEP), which targets increasing renewable energy's share to 50% by 2030.

Why is Eritrea partnering with Solarcentury?

Eritrea's collaboration with Solarcentury and the African Development Bank underscores the country's commitment to renewable energy and sustainable development. As Eritrea advances in expanding its solar energy infrastructure, it continues to pave the way toward achieving universal electricity access by 2030.

Where is Eritrea's first solar plant?

The government of Eritrea has received a \$49.92 million grant from the African Development Bank to fund a 30 MW photovoltaic plant in the town of Dekemhare, 40 km southeast of the capital Asmara. It will be the country's first large-scale solar plant.

Does Eritrea have an energy sector?

Yes, Eritrea has an energy sector. The Government of Eritrea gave priority status to the energy sector immediately after the country's independence in May 1991, as shown by the rapid improvement in electricity and oil supplies.

Can Eritrea achieve universal electricity access by 2030?

This project is set to bolster the nation's renewable energy capacity, aligning with Eritrea's ambitious aim of achieving universal electricity access by 2030.

Can Eritrea lead the way to a sustainable future?

The world is at the tipping point for bolder steps and immediate aggressive actions. Eritrea, a country with negligible emission contribution, can potentially lead the way to secure a safe and sustainable future by taking a different path from previous development trajectories.
