

Estonia Large Smart Park Energy Storage Cabinet

Overview

Why is Estonia building a Battery Park?

Estonia has initiated construction of what will be the largest battery park in Europe that will significantly contribute to the synchronization of the Baltic power grids with Europe by 2025: this project of Evecon, Corsica Sole and Mirova will enhance the energy security and will boost renewables in Estonia.

Why is energy storage important for Estonia?

Energy storage is also critical for the ability of Estonia to achieve zero-emission levels for electricity generation by 2030.

Where are large scale battery storage projects being implemented?

Similar projects are being implemented in different European and global locations as nations attempt to balance their grids and increase the share of renewable power sources. Other parts of the world such as America and Australia are also heavily investing in large scale battery storage.
