

# **Estonia New Energy Storage**

#### **Overview**

Where is Estonia's largest battery storage facility located?

The flagship battery storage project commenced operations on February 1, only days before cutting ties with the Russian power grid. Estonian state-owned energy company Eesti Energia has inaugurated the nation's largest battery energy storage facility at the Auvere industrial complex in Ida-Viru County.

How will a battery energy storage park work in Estonia?

The battery energy storage park and its substation will be connected to the electricity transmission network using a 330kV AC underground cable, marking a first in Estonia. Baltic Storage Platform confirmed that the BESS will seek to ensure the stability and resilience of the Estonian electricity grid.

How much will Estonia's nuclear power plant cost?

He said on no specific reactor has been chosen yet. The plant is expected to be built by private investors and company Fermi Energia has been at the forefront of Estonia's nuclear power plant discussions. The project is expected to cost €2 billion euros and small modular reactors with a capacity of 300 megawatts are being considered.

How much energy does Estonia use?

Estonia's all-time peak consumption is 1591 MW (in 2021). In 2021 the electricity generated from renewable energy sources was 29.3 %, being 38% of the share of renewable energy in gross final energy consumption. Oil-based fuels, including oil shale and fuel oils, accounted for about 80% of domestic production in 2016.

Will nuclear energy protect Estonia's economy against energy price shocks?

Nuclear energy was also on the table last Thursday when the government discussed ways of safeguarding the Estonian economy against energy price

shocks in the future. Because nuclear energy is heavily regulated on the international level, its implementation is far more complicated and time-consuming than building any other kind of power plant.

How has the transition to a 15-minute balancing period impacted Estonia's energy storage?

State-owned energy company Eesti Energi management board member Kristjan Kuhi recently highlighted to Energy-Storage.news Premium that the transition to a 15-minute balancing period and the desynchronisation of the Baltic electricity system from the Russian grid have spurred growth in Estonia's energy storage sector.
