

Estonia Tartu Compressed Gas Energy Storage Project

Overview

Does Estonia need a storage system?

Kristjan Kuhi: Estonia and the whole Baltic region is currently rapidly increasing its renewable energy production. The more production of non-dispatchable renewable energy we have on the market, the more the electricity system will need storage to keep prices stable.

Can Eesti Energia design similar storage facilities outside Estonia?

The 25MW/50MWh BESS project is a pilot project, which means that we want to convince ourselves that it is possible to design similar storage facilities outside Estonia, i.e. in Eesti Energia's other home markets in Latvia, Lithuania and Poland.

Why is Eesti Energia building a large-scale storage system?

Eesti Energia will build the company's first large-scale storage system at the Auvere industrial complex later this year to balance the fluctuations in electricity prices caused by the growth in renewable energy production and to support the stability of the electrical system.

Which Bess project is most suitable for Eesti Energia?

LG's proposed project was most suitable for Eesti Energia regarding the technology and its cost. The pumped hydroelectric power plant project is currently at the pre-study stage, where work continues to develop a commercially viable and technically feasible solution. What other BESS projects are we likely to see in Estonia in the near future?

•

Will Eesti Energia install a grid-scale battery energy storage system?

Eesti Energia, a utility based in Estonia, will install the country's first grid-scale battery energy storage system (BESS).

Estonia Tartu Compressed Gas Energy Storage Project

Comparative evaluation of advanced adiabatic compressed gas energy

This approach involves utilizing hydrogen and nitrogen as working fluid. The technical evaluation includes energy and exergy analysis supported by economic and ...

<u>WhatsApp</u>

Estonia is investing in energy storage. A milestone towards a ...

Construction has begun in Estonia on two energy storage facilities with a total capacity of 200 MW and 400 MWh. On Thursday, a symbolic groundbreaking ceremony took ...

WhatsApp

Overview of compressed air energy storage projects and ...

Energy storage (ES) plays a key role in the energy transition to low-carbon economies due to the rising use of intermittent renewable energy in electrical grids. Among the ...
