

# Finland Telecommunication Base Station Energy Storage Project

## **Overview**

Which energy companies are launching new projects in Finland?

Aquila Clean Energy has launched construction on a 50MW BESS in Finland, while MW Storage has launched two new projects in the country. Battery energy storage systems (BESS) from several firms helped the energy system recover after the NSL interconnector, which connects the UK and Norway, suddenly stopped exporting power to the UK.

Why do telecommunications networks need battery energy storage?

Telecommunications infrastructure networks have a big need for backup power, being made up of millions of components that must all have power simultaneously for the national network to function properly. Battery energy storage installations can provide this.

Is Fingrid a 'largest telecomms service provider' in Europe?

Fingrid has invested in a digital/telecomms service provider to develop and 150MWh VPP, what they are calling the largest in Europe.

## **Finland Telecommunication Base Station Energy Storage Project**

# Polarium contributes to project with Telia and the Swedish Post ...

Modern mobile base stations typically rely on grid electricity, with diesel generators serving as conventional backup sources. The Offgrid Roslagen project addresses the urgent ...
