

German energy storage product exporters

Overview

What is energy storage in Germany?

Energy storage systems are an integral part of Germany's Energy Transition (Energiewende). While the need for energy storage is growing across Europe, Germany remains the lead target market and the first choice for companies seeking to enter this developing industry.

Is Germany a key market for energy storage?

While the need for energy storage is growing across Europe, Germany remains the lead target market and the first choice for companies seeking to enter this developing industry. Germany stands out as a unique market, development platform and export hub for energy storage systems.

Does Germany have a wind power plant?

Installed wind energy capacity in Germany has also witnessed significant growth in recent years, growing from 26.9 GW in 2010 to 63.7 GW in 2021. In October 2022, Fluence Energy and TransnetBW announced plans to develop a 250 MW battery energy storage (BES) as a transmission project in Germany.

Does Germany have a grid-parity for photovoltaic & energy-storage?

In 2018, photovoltaic (PV) and energy-storage for households reached grid-parity: storing PV energy with batteries became cheaper than the price from the public power network. However, the majority of PV systems in Germany are not yet connected to batteries – in 2018 only 8% were equipped accordingly.

How many home storage units are there in Germany?

In 2020, more than 100,000 home storage units were implemented across Germany, bringing the total number to 300,000. In 2018, photovoltaic (PV) and energy-storage for households reached grid-parity: storing PV energy with batteries became cheaper than the price from the public power network.

Why is Germany a good location for solar power?

Our chemical arm also has production sites on location in Germany, especially as a supplier for the automobile industry. And last but not least, Germany is an important location for the solar power branch of Total, Sunpower, in Germany's position as the leading market in renewable energies." (2014)
