

# Global Communication Base Station Inverter Grid-Connected Company

#### **Overview**

#### Can GFM inverters reduce grid frequency?

The company has now verified the results of using GFM inverters in a setting similar to real environments, including the actual use of renewable energy, and has demonstrated that mounting GFM inverters on photovoltaic power generators suppresses decreases in grid frequency by approximately 30%.

What is a microgrid inverter?

Figure 1: Overview of microgrids. Toshiba developed a prototype GFM inverter that provides synthetic inertia and suppresses the fluctuations of the grid frequency in distribution systems even when fluctuations in power supply or power demand occur (Figure 2) and demonstrated its effectiveness.

What companies are working in the smart grid space?

From GE to IBM, Schneider Electric to ABB, there is a whole host of companies working in the smart grid space to make it, well, smarter, as well as more efficient, resilient and reliable.

What is the global smart grid market?

The developments in smart grid systems, including smart appliances, smart meters, smart substations and synchro phasors, has come a long way in recent years, bringing many critical improvements in the realm of energy production. Emergen Research states that the global smart grid market is expected to reach US\$122.97bn by 2027.
