

How much does a 20 watt solar panel cost

Overview

As of 2025, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). How much does a 20 kW solar panel cost?

On average, a 20 kW solar panel system costs \$55,000, according to real-world quotes on the EnergySage Marketplace from the first half of 2024. However, your price may differ; solar costs can vary significantly from state to state. The table below should give you an idea of what you can expect to pay for a 20 kW solar panel system in your state.

How much does a solar panel cost?

Today's premium monocrystalline solar panels typically cost between 30 and 50 cents per Watt, putting the price of a single 400-watt solar panel between \$120 to \$200, depending on how you buy it. Less efficient polycrystalline panels are typically cheaper at \$0.25 per Watt. The cost of a solar panel also depends on how you buy it.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

Where can I buy a 20 kW solar system?

Featuring daily updates with the lowest prices on solar panels, SunWatts has a big selection of affordable 20 kW PV systems for sale. These 20 kW size grid-connected solar kits include solar panels, DC-to-AC inverter, rack mounting system, hardware, cabling, permit plans and instructions.

How much electricity does a 20 kW solar system produce?

A 20 kW solar panel system produces about 29,033 kWh of electricity annually, but the exact amount depends on where you live and how much sun you get. DIYing a 20 kW solar panel system usually isn't your best bet: You're much better off hiring a professional solar company for optimal results. How much does a 20 kW solar system cost?

.

How big is a 20 kW solar system?

Most solar panels have a capacity of 300 watts. To achieve a 20kW solar system, you will need 67 or more panels. Each panel occupies approximately 17 square feet, resulting in a total footprint of 1133 square feet for a 20kW solar system.
