

# How much does a photovoltaic container cost in Benin

### **Overview**

How much does a photovoltaic power plant cost in Benin?

Photovoltaic power plants' levelized cost of energy ranges from 0.11 USD/kWh to 0.125 USD/kWh. Incentives and subsidies could lower the levelized cost of energy and increase solar photovoltaic investment in Benin. About 60.0% of Benin's population currently lacks access to reliable electricity to perform their daily activities.

Are solar PV projects feasible in Benin?

This study considers a 10.0 MW grid-tied system in seven different regions to evaluate the feasibility of solar PV projects in Benin. Grid-connected solar PV systems have two main components: the PV array and the inverter. The connection to the national grid is done using appropriate inverters that must be carefully selected (Etier et al., 2015).

Should Benin implement a grid-tied solar photovoltaic project?

The country must foster the development of policies that can accelerate the deployment of renewable energy projects and promote the use of new technologies for a cleaner and safer environment. The study results could guide Benin and other developing countries willing to implement a utility-scale grid-tied solar photovoltaic project.

What is the solar energy potential of Benin?

Benin's solar energy potential and global horizontal irradiation increase from the south to the north, as presented in Fig. 1. Similarly, the cities' daily solar irradiation is shown in Table 3. In Benin, the annual daily horizontal solar radiation ranges from 4.89 to 5.68 kWh/m 2 /day in the chosen seven cities.

Could incentives and subsidies increase solar PV investment in Benin?

The findings show that incentives and subsidies could lower the LCOE and increase solar PV investment in Benin. Investing in utility-scale PV systems

could help Benin increase its electricity access rate and mitigate greenhouse gas emissions for sustainable development.

How much does electricity cost in Benin?

In 2021, the cost of residential electricity was noted as \$0.560 per kilowatthour. 3 A 2020 survey in Benin revealed that 40% of the population experienced consistently reliable electricity service. Conversely, 5% reported inconsistent or non-existent electricity despite being connected to the grid.
