

How much is the subsidy for Swedish energy storage projects

Overview

A government subsidy in Sweden will cover 60% of the cost of installing a residential energy storage system, up to a maximum of 50,000 kroner (US\$5,400). Battery, wiring, management systems and installation will all be eligible for payment under the subsidy. Can home battery storage be taxed in Sweden?

Up to 50% Tax Reduction on Home Battery Storage, Applicable to These Scenarios Recently, the Swedish Tax Agency has relaxed the restrictions on subsidies for home battery storage. Home battery storage can now be used for applications other than storing solar energy, and these applications are also eligible for tax reductions.

Does Sweden offer financial aid for CCS projects?

The Energy Agency aims to make a first allocation before the end of this year. Besides the bio-CCS aid, financial aid for CCS-projects in Sweden is available through the Swedish government's Industrial Leap program (Industriklivet), also managed by the Energy Agency.

How is CO2 storage regulated in Sweden?

The assessment method is thoroughly regulated and includes risk assessments, exposure evaluations, and identification of potential leakage effects. CO2 capture and storage require an environmental permit under the Swedish Environmental Code. Additionally, a permit under the Act on the Continental Shelf will typically be required for CO2 storage.

How does the Swedish state aid scheme work?

In July the same year the European Commission approved the Swedish state aid scheme in 2024. Under the scheme, the aid will be awarded through a competitive bidding process, a reversed auction, with the first auction in 2024. During15 years, beneficiaries will receive a grant per tonne of biogenic CO2 that is permanently stored.

What is a net-zero CO2 storage facility in Sweden?

In Sweden, the Geological Survey of Sweden (SGU) is the competent authority for the recognition of net-zero projects related to CO2 storage under the regulation. Locations for storage of CO2 In Sweden, storage facilities with capacities above 100,000 tons are only permitted under the seabed, mainly within Sweden's Exclusive Economic Zone.

Is Sweden ready for bio-CCS?

Financial aid Sweden is now also especially well-positioned for bio-CCS as the government enacted Regulation (2024:626) on state aid for the capture, transport, and storage of biogenic CO2 came into force in August this year.
