#### **Overview**

Before we go any further, we highly recommend that you choose a pure sine wave inverter. This type of inverter delivers high-quality electricity, similar to your utility company. This way, none of your appliances run the risk of being damaged. Now, when it comes to sizing your inverter, you always need to check.

We have summarized the appliances that inverters from 300W to 3000W can run depending on their rated maximum power. Note to our readers: Use the above formulato determine.

Why should you use a pure sine wave inverter?

Pure sine wave inverters produce stable power with low harmonic distortion you can safely use with medical equipment. Such clean power output buys you peace of mind knowing that your expensive devices are safe from power disruptions.

Do you need a sine wave inverter for solar panels?

You need a pure sine wave inverter if you plan to install solar panels on your roof or RV. Most appliances in your home use AC power, so you need it to convert the DC power that solar panels produce to AC power. It also brings up the voltage to the grid level.

How do I choose the best pure sine wave inverter?

Choosing the best Pure Sine Wave inverter depends largely on the features you want for your inverter. There are over 30 different brands of inverters, and performance can vary by wattage. A brand that makes a very good 2000W inverter may not have as good a 5000W inverter. Other factors make a difference in the inverter you choose.

Should I buy a modified sine wave inverter?

When it comes to solar array inverters, you do not want to buy a modified sine wave inverter. Contrary to pure sine wave inverters, modified sine wave inverters only attempt to mimic a sine wave, which can result in regular and

bad disruptions to the grid and to your experience.
