

# How much wind power does Trinidad and Tobago s mobile energy storage site have

### **Overview**

Why is offshore wind important in Trinidad & Tobago?

Ofshore wind also reduces the issue of land usage associated with other forms of renewable energy, such as solar energy. Trinidad and Tobago possesses facilities including industrial ports, and equipment such as heavy-lift cranes that can support the wind energy industry during the construction and operations phases.

How much wind energy does Trinidad and Tobago have?

Trinidad and Tobago possesses facilities including industrial ports, and equipment such as heavy-lift cranes that can support the wind energy industry during the construction and operations phases. in excess of 25GW both onshore and ofshore. Furthermore, the report puts forward a target of 2GW of installed wind energy capacity by 2035.

What is a wind farm in Trinidad & Tobago?

The main objective of this project is the promotion of the productive use of renewable energy to reduce greenhouse gas (GHG) emissions and to diversify the local energy portfolio mix for power generation. The development of a wind farm in Trinidad and Tobago is one step towards developing a low carbon society.

Why should Trinidad and Tobago invest in wind energy?

There are various driving factors towards integration of wind energy technologies into Trinidad and Tobago's energy mix. These factors include a high resource potential; a strong demand for green hydrogen; supporting industrial infrastructure; and a skilled energy workforce.

Will Trinidad and Tobago develop a wind energy industry by 2035?

The document outlines steps that should be taken for successful development of a wind energy industry in Trinidad and Tobago by 2035. In agreement with

the roadmap for hydrogen, the wind energy strategy indicates that there is exploitable wind energy potential of ofshore wind energy.

What is Trinidad & Tobago's energy plan?

The Plan establishes the vision and broad framework for Trinidad and Tobago's development to 2030 and defines the key priorities for the first planning period 2016-2020. It includes goals to improve energy eficiency and incorporate renewable energy into the energy supply. Medium-term electricity sector plan. 9.

### How much wind power does Trinidad and Tobago s mobile energy st

# Setting The Path For Wind Energy Generation in Trinidad & Tobago ...

The report also identifies potential onshore and offshore sites for wind energy development and suggests an implementation plan to achieve the country's renewable energy goals.
