

How to check the battery cabinet power

Overview

Where should a battery cabinet be installed?

If the battery cabinet is installed adjacent to the UPS, the recommended installation location for the battery cabinet is on the right side of the UPS cabinet. This location will allow for future expansion using an external module. Cabinets can be permanently bolted to the floor or left standing on leveling feet.

How do you connect a battery to a cabinet?

Route the ground wire (from the field kit) from the ground stud in one battery cabinet, under the lower battery tray and through the cabinet-to-cabinet cable access area in the side of the cabinets, and attach to the ground stud in the other battery cabinet (see Figure 4-4). Hardware is provided on each ground stud.

How do I measure standby and alarm current?

Here's the correct method for measuring standby and alarm current of a conventional (or addressable) fire alarm panel (with no EVCS system): Disconnect the jumper between the two batteries that normally form the 24VDC supply. The fire alarm system should annunciate a trouble condition. (This also happens to be part of the testing criteria!).

What is power cycling on a pwrCell Battery Cabinet?

Power cycling a PWRcell system will completely remove power from all components. This is often used when the system is stuck in an offline state.

What Is A Battery Cell Imbalance On a PWRcell Battery Cabinet?

.

How do I install a 9395 model 1085 Battery Cabinet?

The 9395 Model 1085 battery cabinet is designed to be installed in a

standalone configuration using two to four battery cabinets. Power wiring is installed externally between each battery cabinet and the UPS or battery disconnect using conduit. Battery cabinets may be installed adjacent to the UPS or in a separate location.

How do you test a fire alarm battery?

(Refer to Appendix F2, Silent Accelerated Test); or A battery capacity meter test. (Refer to Appendix F3, Battery Capacity Meter Test); or In lieu of the above battery tests, replace the battery with a new set having a current date code, amp-hour capacity and of a type as recommended by the manufacturer of the fire alarm system.
