

# How to request to set the power supply of the base station

#### **Overview**

How do I pick up a base station/repeater?

DO NOT pick up the base station/ repeater by holding the Preselector (if so equipped). Use the handles on the front of the base station/repeater, or the Power Supply and Power Amplifier casings when picking up the base station/repeater. Remove the station front bezel from its chassis locking clip by carefully pulling it forward.

What is a power supply module?

A Power Supply Module is used in a base station/repeater with a Power Amplifier Module (e.g. rated at 100 W output power). The model generates the +5.1 V, +14.2 V, and +28.6 V operating voltages for the base station/ repeater modules. These modules have power factor correction and include a connection for battery backup.

How do I optimize a base station/repeater?

Optimizing is performed through the Customer Programming Software (CPS) with the kit number, (NAG: RVN5115, EMEA/ANZ: GMVN5141, APAC: PMVN4130) and a USB cable (NAG: CLN8665A, EMEA/APAC: DDN9957) is required. After the base station/repeater is operational, the base station/repeater's codeplug data must be copied to a PC-compatible computer.

Where are the service ports located on the mtr3000 satellite receiver?

Service ports and LEDs are located on the front of the SCM. Figure 3-2 shows the position of the connectors on the SCM. The Motorola MTR3000 Satellite Receiver provides a modular, flexible analog only station designed for today's communication systems and for the future.

What is the maximum operating temperature of a power supply?

When installing the equipment, all requirements of relevant standards and

local electrical codes must be fulfilled. The maximum operating ambient temperature of this equipment is 60°C. The maximum operating altitude is 3000 meters above sea level. The 28.6 VDC output from the power supply to the PA is at an energy hazard level (exceeds 240 VA).

How do I replace the station front bezel?

Replace the station front bezel by inserting one of the front bezel locking clips into corresponding latch on the station housing, and carefully pressing the panel on the opposite side until the second locking clip snaps into place.
